The political economy of China's economic reform is the economic system and model of economic development employed in the People's Republic of China. This makes gauging the true size and scope of the state sector difficult, particularly when SOEs are involved. The socialist market economy in the People's Republic of China is a system that combines elements of state socialism with market incentives. It is characterized by a semi-command economy with a focus on state planning and economic policies. The transition to this system began in the late 20th century, with the aim of increasing economic efficiency and promoting social stability. The challenge has been to balance economic growth with social welfare and environmental sustainability.
